

Get more value from your Secret Server deployment

Unlock stronger security and greater efficiency when your team upgrades to Secret Server on the Delinea Platform.

Your Secret Server investment is solid. Now it's time to modernize.

- ▶ Secret Server Cloud has long set the standard for privileged access management. But rising identity sprawl, escalating audit demands, and fragmented identity silos now threaten the path to operational efficiency and long-term ROI.
- ▶ Upgrading from Secret Server Cloud to Secret Server on the Delinea Platform eliminates bottlenecks by introducing built-in automation, improved audit readiness, and stronger and more scalable identity security – without disruption.

Advantages of upgrading:

By upgrading now to Secret Server on the Delinea Platform, you'll get...

94%*

faster time to value

99.995%

Delinea Platform uptime

80%*

fewer always-on privileged credentials

*Experienced in specific customer environments

Benefits of using Secret Server on the Delinea Platform

 **Optimize team efficiency and productivity**
Automation and context-aware intelligence via Delinea Iris AI (an opt-in capability) helps security teams become more efficient by reducing manual work and freeing up time for higher-value priorities.

 **Reduce silos with an integrated, unified platform**
Eliminate complexity by integrating disparate security tools with a modular, composable platform that centralizes access, visibility, and control.

 **Scale securely with predictable costs**
Expand privileged access across teams, locations, and workloads without added infrastructure, eliminating surprise costs as your business grows.

 **Upgrade to a future-ready identity foundation**
Your teams can become more agile and future-ready with Secret Server on the Delinea Platform. It gives you access to a unified cloud-based platform that can evolve to support your company's growing identity security needs – from vaulting and privileged remote access to continuous identity discovery, secure remote access, privileged control for servers, threat detection and response, and more.

FAQs: What's involved in upgrading?

What about logistics?

No new infrastructure

What if I like what I have?

No feature loss — plus more capabilities

Will it work with my stack?

No integration rework

Will we have to go offline?

No downtime

How long does it take?

Upgrade in two hours or less*

Will we retain user activity and records?

Audit trails remain visible

*Experienced by most customers

“ What security leaders say about the Delinea Platform

Security leaders who are using capabilities on the Delinea Platform say that it has delivered real business and security impact.

Risk reduction and operational excellence

“By integrating privileged access into IT operations, we cut deployment time by 50%, eliminated months of manual effort, and reduced standing credentials by 80% — strengthening security while lowering operational burden.”

Steve Rosenquist, Cyber Security Senior IAM Manager, UL Research Institutes

The Delinea Platform advantage

“The Delinea Platform let us standardize and tighten privileged access... We've consolidated tools, enforced least-privilege on endpoints, and cut request-to-vault times from days to hours — about a 94% faster time to value.”

Ulises Cabello, IT Security Manager (IAM), Stewart Title

Strategic pivot: From manual to automated

“Automation reduced privileged access to 1–2 hours, cut investigation time by up to 50%, and freed teams for higher-value security work.”

Biju Kumar, Systems Support Specialist, United Development Company

Get security gains with little effort

Upgrading to Secret Server on the Delinea Platform takes minimal effort, preserves everything you rely on today, and unlocks greater resilience, automation, and long-term flexibility.

Most organizations complete the guided upgrade in as little as two hours.

- ▶ Your team can easily initiate the upgrade in the Platform Upgrade Center under “Settings.”
