Federal agencies face no shortage of cybersecurity challenges and requirements, including modernizing to meet Executive Order 14028 on “Improving the Nation’s Cybersecurity” and implementing NIST security standards. In this journey, the government must secure complex, distributed, disconnected hybrid environments while ensuring frictionless user experiences for employees, contractors, and warfighters in some of the world’s most remote locations.

Privileged Access Management (PAM) plays a critical role in securing the mission by ensuring users have access to only the applications and data needed for their roles. PAM can be complicated — especially when it comes to federal agencies that have tens of thousands of users accessing thousands of applications and data stores — but the solution doesn’t have to be. At Delinea, we believe the opposite of complex isn’t simple — it’s seamless.

**A partner for modern access requirements**

Delinea seamlessly extends PAM by providing authorization for all identities, controlling access to an organization’s most critical hybrid cloud infrastructure and sensitive data to help reduce risk, ensure compliance, and simplify security. Our PAM solution also enable just-in-time, just-enough privilege elevation to ensure user productivity and mission progress, while least-privilege based on a Zero Trust approach prevent the lateral movement of attackers. Finally, our early warning of privilege-related attacks enables faster event containment.

**Engineered for seamless security across complex workflows**

Federal agencies depend on secure collaboration across silos to advance the mission. Delinea delivers reliable, real-time privilege controls needed to fuel and secure these modern workflows. Our solutions enable automated lifecycle management from discovery through decommissioning, and secure access for remote IT staff and partners without a VPN.

**Faster time to value**

Delinea understands the mission cannot wait, and our solutions are designed to accelerate time to value. We deliver Day One adoption of privilege controls at scale. Delinea’s PAM products are pre-integrated with over 200 solutions and delivers out-of-the-box auditing and reporting for streamlined compliance.

Whether in the cloud or on-premises, our solutions are readily customizable, scalable for growth, and powerful enough to secure your agency no matter where it is on its PAM maturity journey.
Delinea Platform

Seamlessly extend Privileged Access Management to provide just-in-time access with easy, adaptive controls.
- Establish a Secure Vault
- Secure Remote Access
- Extend MFA Enforcement
- Access the Marketplace
- Scale Easily

Delinea is a leading provider of privileged access management (PAM) solutions for state and local governments on the path to modernization. Our solutions provide centralized management and rapid time-to-value for departments that need to reduce risk, ensure compliance, and simplify security. Delinea removes complexity and defines the boundaries of access so state and local governments can streamline operations and better serve constituents.
delinea.com

Protect Privileged Access

Secret Server
Discover, manage, protect, and audit privileged access
- Establish a Secure Vault
- Discover Unknown Accounts
- Delegate Access
- Manage Secrets
- Control Sessions

Privileged Behavior Analytics
Detect anomalies in privileged account behavior
- Secure Accounts
- Establish Baselines
- Monitor & Identify
- Alert
- Take Action

DevOps Secrets Vault
Protect the secrets that DevOps teams and RPA tools need
- Establish Vault
- Centralize Secrets
- Automate & Scale
- Issue Certificates

Account Lifecycle Manager
Control and manage service account governance
- Establish Workflow
- Delegate Ownership
- Provision Service Accounts
- Enforce Governance
- Decommission Accounts

Secure Endpoints and Devices

Server PAM
Manage identities and policies on servers
- Centrally Manage Identities
- Enforce Adaptive MFA
- Adopt Least Privilege
- Improve Security & Compliance

Privilege Manager
Implement endpoint application control for workstations
- Deploy Agents
- Manage Accounts
- Define Policies
- Elevate Applications
- Improve Productivity

Enable Remote Work

Connection Manager
Ensure unified management of remote sessions
- Establish Remote Access
- Manage Sessions
- Centralize Control
- Record Sessions
- Track & Audit

Remote Access Service
Secure remote access for vendors and third-parties
- Secure Remote Access
- Reduce Vulnerability
- Streamline Deployment
- Centralize Third-Party Access
- Monitor and Record Sessions
