FROST & SULLIVAN

Leader: 2025 Frost Radar Report Non-human Identity Solutions

Delinea enables enterprises to confidently authorize access in real time, across multi-cloud and on-premise environments. Easy to use and built to scale, we meet you where you are: reducing security and compliance risk even for the most complex, automated, and distributed environments.

Solve your identity security challenges with Delinea

Human and non-human identities now access critical systems and data at a pace traditional governance models can't match. Static controls and periodic reviews are no longer enough. Delinea enables real-time, defensible access decisions, replacing static privileges with contextual, just-in-time, and ephemeral access, granting only what's needed, when it's needed, without sacrificing trust or governance.

With Delinea's cloud-native platform, you:

- ✓ Stop unauthorized access to your systems and data.
- ✓ Control access for human and non-human identities
- ✓ Extend identity security across cloud, DevOps, and hybrid environments.
- ✓ Eliminate static privileges that cause systemic risk exposure.
- ✓ Maintain trust and governance with defensible access decisions

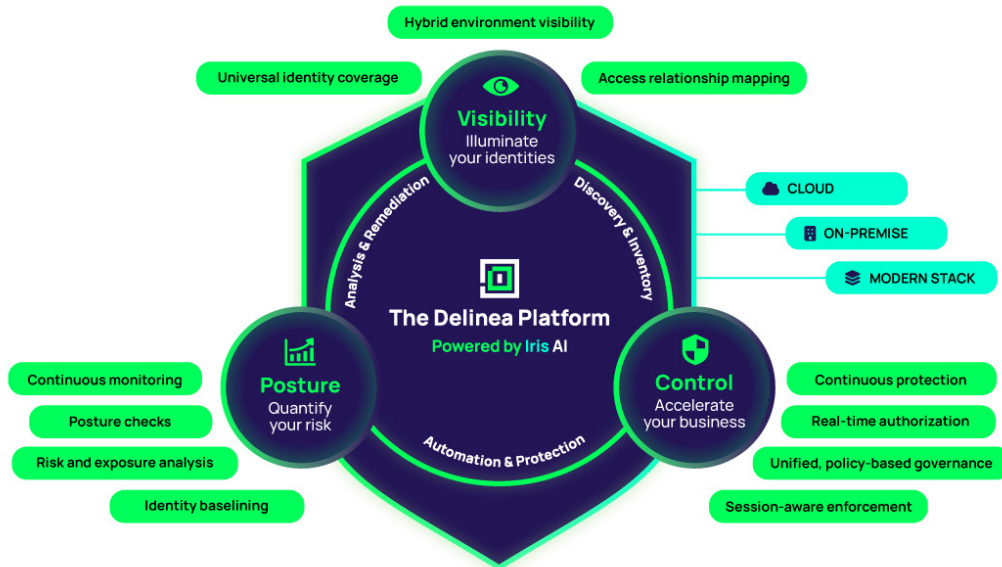

Delinea reduces risk and gives you more control without adding complexity or slowing your business.

Delinea's approach: Identity as the control plane for modern security

Built on our PAM heritage, we deliver an identity control plane that security teams trust to gain visibility, assess their security posture, and enforce access controls in real time.

Delinea delivers visibility, security posture and control

Delinea replaces fragmented tools and static privileges with continuous visibility, real-time intelligence, and adaptive control.

VISIBILITY

Discovery & inventory

Eliminate blind spots. Delinea continuously discovers every identity, human, machine, and AI across on-premise, cloud, and DevOps environments the moment they exist. You gain a clear understanding of who has access to what, how they got it, and if it still makes sense.

POSTURE

Analysis & remediation

Identify and prioritize risk. Delinea monitors all identity configurations and activity, establishes a behavior baseline, and provides intelligent risk scoring to surface exploitable threats, enabling teams to take action to protect the business.

CONTROL

Automation & protection

Enforce zero standing privilege automatically. Delinea closes the gap between who you are and what you are doing at the moment of access for every identity, through intelligent, continuous runtime authorization, granular controls, and predictive policy enforcement.

Experience the Delinea difference

Security Outcomes	Operational efficiency
<ul style="list-style-type: none"> 70% reduction in standing privileges 90% less alert noise Secure privileged access for AI/NHI 	<ul style="list-style-type: none"> Deploy in weeks, not months 3X lower total cost of ownership 90% fewer resources required

Delinea is built for security teams that refuse to choose between security and progress. By unifying visibility, risk intelligence, and enforcement into one control plane, you empower teams to secure the enterprise and accelerate growth simultaneously.

**Built for the AI era. Built for defensibility.
Built to secure the modern enterprise.**

Delinea

Delinea is the identity security control plane enterprises trust to secure human, machine, and AI identities across on-premises, multi-cloud, and dynamic environments. Built for the AI era, Delinea continuously discovers identities, analyzes risk, and enforces least-privilege through just-in-time, policy-based authorization. By supporting both credential-based and ephemeral access models, Delinea enables organizations to reduce risk, simplify governance, and move toward Zero Standing Privilege at their own pace. Easy to deploy and built to scale, Delinea delivers value in weeks, not months, with up to 90% fewer resources required and 99.995% uptime. Learn more at delinea.com.
