Delinea

Mitigate Risk from Business Users

Seamlessly enforce secure credential access for every identity from any browser and any device

Identities who need access to business accounts come in all shapes, sizes, and tolerances for security workflows, making enforcing security protocols challenging, to say the least.

The Delinea Credential Manager enables business users to securely access credentials in a user-friendly vault with enterprise-grade security without the friction while reducing risk and increasing oversight for administrators across all credential activity.

HOW IT WORKS

✅ Increase oversight

- Ensure visibility into credentials across all users and all access points to simplify management while increasing control and oversight of business user credential use.

✅ Increase security

- Reduce shadow IT and vulnerable access points from business users with access to an easy-to-use enterprise-grade vault for all users.

✅ Increase efficiency

- Enforce security protocols with simplified and secure access to credentials for all users across any device and from anywhere — mobile and web while supporting assigned permissions.

✅ Increase adoption

- Remove friction by making it easy for business users to support credential hygiene and follow secure access in an easy-to-use vault.

Delinea Credential Manager ensures seamless credential access across web and mobile, reduces risk with granular controls, and enhances administrator visibility into credential hygiene and usage across all identities.

Credential Manager Benefits

REDUCE RISK
Easily enforce security protocols for business users across your environment

INCREASE EFFICIENCY
Quickly provide enterprise-grade vault access for business users with a friendly experience

IMPROVE SECURITY
Gain full visibility into user activity and manage authentication through platform-based policies

EXTEND OVERSIGHT
Seamlessly enforce business user permissions and credential hygiene

EASY BROWSER EXTENSION
Business users can access, search, and autofill their vaulted credentials in any browser with one-click

Empower all users to seamlessly adopt security policies

By simplifying secure credential access, you seamlessly remove friction, boost adoption, and eliminate shadow IT. Administrators enhance efficiency with secure, centralized oversight of credential usage by all identities, while business users gain seamless, secure access to the credentials they need anytime, anywhere.

Delinea Credential Manager ensures protection against vulnerabilities and supports productivity with controls in the background.
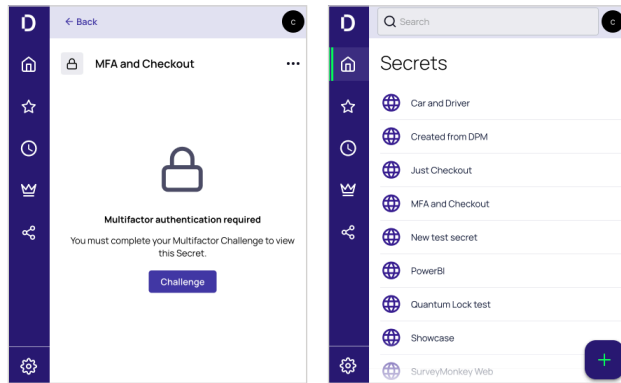

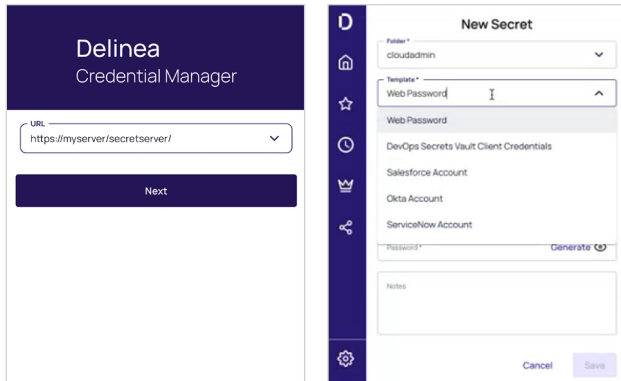

✅ Administrative oversight

Administrators can enable session recording for specific secrets, assign policies to folders, and view audit records of shared secrets to ensure compliance and visibility across all activity.

✅ Advanced security features

Manage Multi-Factor Authentication (MFA), access requests, and Secret checkout, ensuring only authorized users can access sensitive credentials.

✅ Browser extension integration

The browser extension hooks into the Delinea Platform and Secret Server, allowing business users to securely access their credentials directly in their browser.

✅ Secure credential management

Users can create, view, edit, and autofill credentials directly into websites, ensuring that vaulted credentials access is secure and simple.

✅ Template support

Business users have access to web and credit card templates, which makes it easier to store and manage specific types of credentials securely.

✅ Mobile access

Credentials are fully accessible in the Delinea mobile app, allowing users to securely access, and manage credentials on the go.

Delinea

Delinea is a pioneer in securing identities through centralized authorization, making organizations more secure by seamlessly governing their interactions across modern enterprise. It applies context and intelligence throughout the identity lifecycle, across cloud and traditional infrastructure, data, and SaaS applications to eliminate identity-related threats. Delinea uniquely provides intelligent authorization for all identities, allowing precise user identification, appropriate access assignment, interaction monitoring, and swift response to irregularities. The Delinea Platform accelerates adoption and boosts productivity, deploying in weeks, not months, requiring just 10% of the resources compared to competitors.
