Delinea Platform: Seamlessly Extend Privileged Access Management

The Delinea Platform provides just-in-time privileged access to authorized users with easy-to-use, adaptive controls that reduce risk while enabling growth, efficiency, and scalability

The number of identities, both human and machine, with privileged access is expanding. Most IT and security leaders employ over 75 security tools with little to no unified visibility across them all, making it difficult to manage fragmented privileged identity and access policies. Without a consistent, centralized way to manage privileges, IT and security teams waste valuable time, make mistakes, and leave security gaps that open the door to cyberattacks.

Therefore, a comprehensive view of privileged account security in a centralized location is essential to save time and reduce risk. Only organizations that can rely on a secure, scalable foundation will be able to manage the identity explosion effectively.

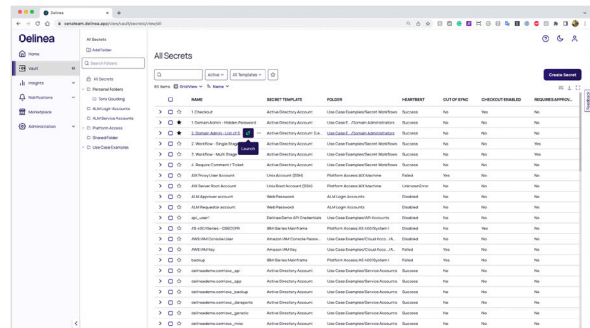

Secure privileged account credentials quickly

At the core of the Delinea Platform is the industry-leading Privileged Access Management (PAM) vault, Secret Server, to ensure simplicity and usability align with enterprise-grade security in one centralized environment.

Secret Server enables you to seamlessly identify, secure, manage, monitor, and audit privileged access for service, application, root, and admin accounts across an enterprise.

Secret Server empowers you to protect mission-critical digital assets and comply with security and regulatory requirements as you scale.

- **Improve security** - enterprise-grade vault with robust controls and High Availability significantly tightens your attack surface quickly

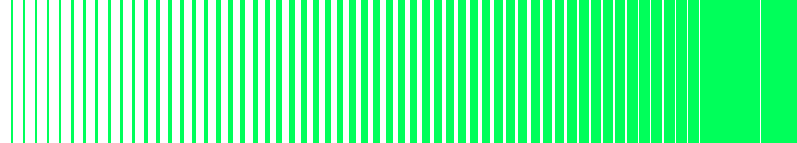

NAME	SECRET TYPE	FOLDER	HEARTBEAT	OUT OF SYNC	CHECKOUT ENABLED	REQUIRE APPROV.
1. Oracle	Active Directory Account	User-Case-Manager-Service-Admin	Success	Yes	Yes	Yes
2. Oracle	Active Directory Account	User-Case-Manager-Service-Admin	Success	Yes	Yes	Yes
3. Oracle	Active Directory Account	User-Case-Manager-Service-Admin	Success	Yes	Yes	Yes
4. Oracle	Active Directory Account	User-Case-Manager-Service-Admin	Success	Yes	Yes	Yes
5. Oracle	Active Directory Account	User-Case-Manager-Service-Admin	Success	Yes	Yes	Yes
6. Oracle	Active Directory Account	User-Case-Manager-Service-Admin	Success	Yes	Yes	Yes
7. Oracle	Active Directory Account	User-Case-Manager-Service-Admin	Success	Yes	Yes	Yes
8. Oracle	Active Directory Account	User-Case-Manager-Service-Admin	Success	Yes	Yes	Yes
9. Oracle	Active Directory Account	User-Case-Manager-Service-Admin	Success	Yes	Yes	Yes
10. Oracle	Active Directory Account	User-Case-Manager-Service-Admin	Success	Yes	Yes	Yes

- **Increase efficiency** - intelligent automation automatically discovers orphaned or forgotten privileges and rotates passwords while seamlessly testing them with "Heartbeat" checks
- **Minimize complexity** - seamless UI and simple deployment ensure rapid adoption across the enterprise

SOLUTION BRIEF

Delinea Platform: Seamlessly Extend
Privileged Access Management

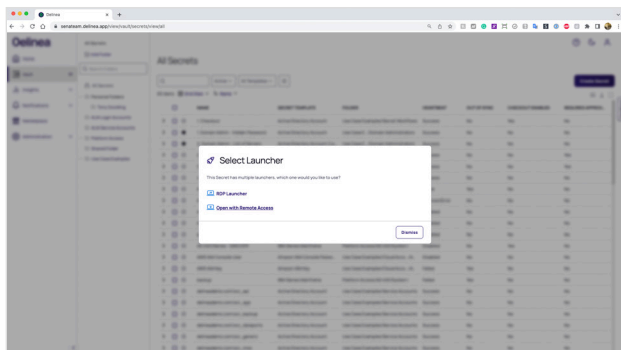

Simplify access for third-party vendors and remote employees

Secure Remote Access within Secret Server on the Delinea Platform enables secure browser-based privileged sessions that can be accessed and monitored from anywhere, striking the right balance between productivity and central control without compromising either one.

With **Remote Access Service** in the Delinea Platform, remote users gain access securely and easily through their web browser using a vaulted account in Secret Server.

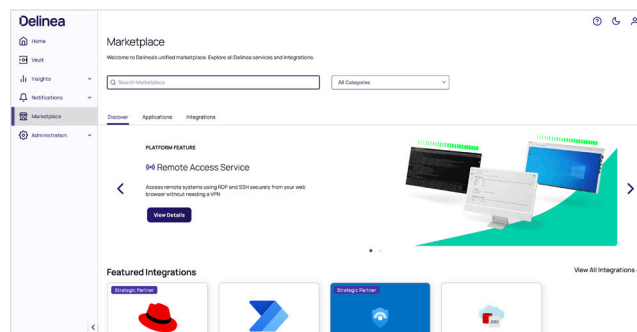

- **Single click** launcher with robust controls gets you going fast
- **Agentless deployment** eliminates additional software and management time
- **Session recording** for every remote session gives you oversight

Centralized ecosystem for streamlined access to vendors and solutions

With the **Marketplace** in the Delinea Platform, you can view third-party integrations in one view, creating better visibility across your security ecosystem.

Working with multiple, siloed security solutions increases costs and takes time as you try to match up data and information. As you grow, it only gets harder.

- **Connect PAM** to all parts of your IT operations and workflow, security reporting, incident response, and more
- **Increase adoption** by embedding PAM in the everyday workflow of IT, security, developers and business users
- **Accelerate digital transformation** with easy-to-access and download third-party solutions

Organizations are evaluating their privileged account security and discovering their expectations and needs have changed. Designed to enable growth while enhancing PAM security with unified visibility, improved efficiency, security, and increased productivity, the Delinea Platform meets you where you are with everything you need when you need it.
